First verify you can successfully re-build KMotionCNC from source code:

- #1 install VS 2008
- #2 open the "solution" called <>\PC VC Examples\BuildExamples\BuildExamples.sln
- #3 Right click KMotionCNC and set it as the "Start up" project
- #4 set the Build Configuration as "Release"
- #5 From the Build Menu select "Rebuild KMotionCNC"
- #6 if successful push F5 to run KMotionCNC
- #7 exit KMotionCNC

To Change a screen:

- #1 from the View Menu select Resource View
- #2 Open KMotionCNC | KMotionCNC.rc | Dialogs
- #3 double-click a Dialog to change ie IDD\_KMOTIONCNC\_6\_LATHE\_2\_AXES
- #4 visually select cells to move/resize or change the cell's properties
- #5 push F5 to compile and run the changed program
